

# Health Plans Survey Results 2010

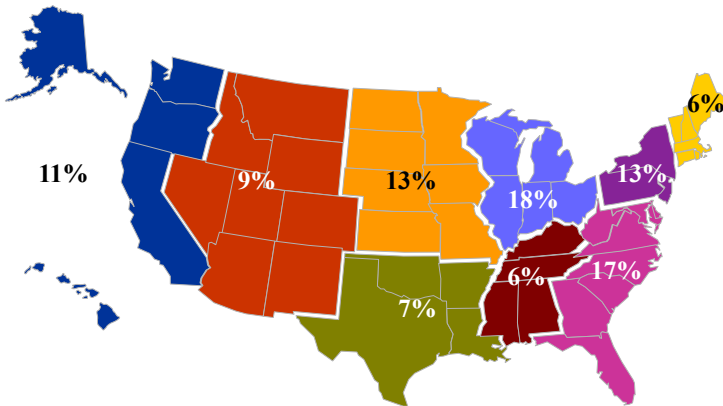

While consumer-driven health plans continue to be of interest to employers, overall health plan design is a critical piece in the puzzle. How are employers positioning their plan design offerings? Take a look at this year's survey results to determine how you fare.

This survey has taken into consideration the plan design and cost of the four primary plan types: PPO, HMO, POS and Indemnity plans. It also covers the prevalence of Health Reimbursement Arrangement (HRA) and Health Savings Account (HSA) plans, and the issues that are foremost on employers' minds as related to health care costs.

In this year's survey, 1,561 respondents summarized 2,097 health plans. This included 1,418 PPOs, 415 HMOs, 219 POSs and 46 Indemnity plans.

## PPO Results

PPO plans continue to be the most popular, with 67 percent of the plan offerings being a PPO. Both HSAs and HRAs stayed steady at 18 percent. Over 15 percent of HRAs are being offered as a total replacement option, which is down from 18 percent in 2009. An additional 25 percent (up from 23 percent in 2009) of the PPO plans use an HSA option, with 17 percent being offered as a total replacement (down from 20 percent last year). The PPO results include information on 1,418 plans.
