

Preventive Services: Covered Medications

[Find out if your medication is on the list](#)

Keeping up with preventive care can help prevent illness and improve your health and wellbeing. If your plan has a Preventive Services benefit, preventive drugs are covered at 100 percent. That means you do not need to pay a copay, coinsurance, or meet your deductible for preventive drugs. Preventive drugs prevent a disease or condition for people who have risk factors. They can also be used to prevent the recurrence of a disease or condition for those who have recovered. They don't include drugs that treat an existing illness, injury or condition. Evidence-based guidelines from United States Preventive Services Task Force (USPSTF), Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention (CDC), and Health Resources and Services Administration (HRSA) are followed to determine which preventive drugs we cover at no cost to you. These guidelines are updated periodically to reflect new scientific and medical advances, so this list and your benefits may change. We include new federal agency recommendations within one year of guidelines being published. If you would like us to cover a drug not found on this list, please call Customer Service at the number listed on the back of your member ID card to request an exception.

Covered Medications

The following drugs are covered with a prescription:

- Aspirin: Generic 81mg dosage is covered.
- Bowel Preparation medications: For those aged 50 years and older receiving a Preventive Colonoscopy, generic prescription and over-the-counter (OTC) products are covered. Examples include: Gavilyte, Peg 3350, and Trilyte.
- Breast cancer risk-reducing medications: Generic raloxifene and tamoxifen are covered.
- Contraceptives for Women: see the Affordable Care Act Covered Contraceptive Products flyer for details
- Fluoride Supplements: For those aged 16 years and younger, generic fluoride tablets and drops (100 mL bottles) are covered.
- Folic Acid Supplements: Generic 400 mcg and 800 mcg folic acid products are covered (250 quantity bottle every 6 months).
- Iron Supplements: For those aged 6 to 12 months, generic iron supplement drops are covered for the prevention of iron deficiency anemia.
- Statin Medications: Generic atorvastatin, lovastatin, pravastatin, rosuvastatin, and simvastatin are covered.
- Tobacco Cessation: see *Tobacco Cessation Coverage* flyer for details
